Computer Science - Software Engineering student

SUMMARY

I am 6th semester student passionate about software development, specializing in Web, AI, and cloud technologies. With a strong foundation in front end development and problem-solving, I strive to write clean, efficient code. A fast learner with an analytical mindset, I thrive in collaborative environments, eager to learn from experienced developers while contributing innovative insights. I seek opportunities to refine my skills and grow into a proficient software developer.

Work Experience

AI Writing Internship at GaoTek

Aug 2025 - Dec 2025

Assisted in creating technical documentation, reports, and articles on Artificial Intelligence, ensuring clarity and accessibility for people in IoT.

Application Developer at Binus University

Feb 2026 - Present

Architected robust back-end solutions, focusing on API optimization and database management to ensure high availability and efficient data processing.

Organization & Leadership Experience

Logistic Staff BurnCup Binus@Bekasi

Nov 2023

Coordinated logistics and ensured the availability of match equipment to support smooth event operations.

Security Coordinator at LDK-A Badminton, Tangerang

Jan 2025

Managed security protocols and ensured participant safety during basic activist leadership training.

Head of Studi Banding Badminton, Bekasi

Aug 2024

Led and managed the Studi Banding event in collaboration with Esa Unggul University.

Logistic Staff at Specta Sport Binus@Bekasi

Oct 2024

Being part of logistic staff at Specta ensure the availability and suitability of match equipment and facilities and support smooth operations

Head of Live Streaming Section for IT Club

Sep 2022 - Jul 2023

Managed and operated live streams for high school events while collaborating with event organizers and technical teams

Training and Competition Coordinator for Badminton

Dec 2024 - Dec 2025

Organized badminton training and tournaments in Binus @Bekasi, managing schedules, registrations, and coordination with coaches.

Certifications & Training

AI Engineer Bootcamp Dicoding X DBS

Feb 2026 - June 2026

Trained in designing, evaluating, and optimizing AI models, leveraging machine learning and deep learning techniques to solve complex computational problems.

Education

Undergraduate Student at Binus University

Sep 2023 - Present

I am a detail-oriented Software Engineering undergraduate at BINUS University, expected to graduate in 2027.

Project

Lecture Helper AI

Oct 2024 - Dec 2024

Developed an AI system in a team of three to help lecturers analyze and monitor student learning patterns in class.

Citizen Care

May 2026 - June 2026

Engineered a digital platform focused on urban sustainability, enabling users to seamlessly report damaged city infrastructure and public facility issues for efficient resolution.

Zero Waste

May 2025 - June 2025

Designed the platform to actively reduce food waste while ensuring affordable meal options are accessible to economically disadvantaged communities.

ADDITIONAL INFORMATION

Skills

- **Technical Skills:** Python, Java, JavaScript, React.js, Node.js, Laravel, Flutter, SQL, HTML/CSS.
- **AI & Machine Learning:** TensorFlow, Scikit-learn, Natural Language Processing (NLP), Computer Vision, Deep Learning.
- **Cloud & Infrastructure:** AWS (EC2, RDS, Load Balancers), Docker, Kubernetes, API Development.
- **Soft Skills:** Technical Documentation & Writing, Collaborative Problem Solving, Adaptability & Time Management.
- **Languages:** English & Indonesian.
